

GRAM Xtrem X

Hygienic, digital and modular

- Hygienic weighing platform with fully digital Xtrem weighing core.
- Made entirely with stainless steel AISI 304.
- Fully autonomous, data sent to an indicator, PC, tablet or iOS or Android smartphone*.
 - Multi-indicator: The platform connects to any indicator or PC connected to the network.
 - Maximum safety: important adjustment and calibration data incorporated in the platform.
 - Connects to WiFi network*, with the data sent to any equipment connected to it or to any other IP network.
 - Total flexibility: Compatible with indicators connected by digital cable or WiFi**.
 - Multipurpose: Attachment for indicators in multiple positions.

Adaptable

5 low-profile weighing platform sizes.

12:10:26	7638900295641

*Needs a Smartphone to be run.

** Optional WiFi board.

Mobility and freedom for viewers

More than one indicator can be connected, with rectangular or round columns on a desktop or wall, with or without cables (WiFi).

Maximum protection

Designed for intensive, heavy use, with the load sensor protected from liquid and dust by its airtight capsule. The whole surface is smooth with soft edges, making it is easier to clean.

Multi-Equipment

The K3X, K3iX, MK3 and MK3P indicators can be connected via the connection cable, or a PC with the Xtrem PC application. Also, at the same time as the Wifi option, the K3W, K3iW indicators, a PC with Xtrem PC software and the Xtrem app (for IOS or Android) can also be connected wirelessly in a touch terminal. All terminals can interact simultaneously with the platform.

APP XTREM

Application for IOS and Android, performs the function of advanced indicator. Connects to the platform without an intermediate indicator (with WiFi board option). With advanced functions: weighing records, tare memory, product weight classification; while the Premium option can export data to Excel and perform bar code scanning. More information in specific Xtrem catalogue.

XTREM PC

PC application, turns the computer into a smart indicator. Connects directly to the platform and shows the weighing data in large size. Highly useful functions: such as copying and dragging the value to another application; displaying the weight in QR code; or scanning and entering it quickly in another application or PC, without modifying the software.

Indicators with WiFi connection

The digital models WiFi K3W and K3iW (stainless steel version) receive the data from the scale through the Xtrem module integrated via WiFi, without cables. These can be exchanged, thanks to the Xtrem digital weighing technology. Maximum coverage of up to 40 metres in areas without obstacles (this range may be smaller, depending on the environmental conditions and area of use).

Up to 4 x K3iW and K3W units can be connected to the same balance, with all units being fully operational and able to work simultaneously.

The K3iW model is manufactured with a highly resistant AISI304 stainless steel structure.

Indicators connected by cable

The K3X and K3iX digital displays (stainless steel version) show the data received by the balance through the Xtrem module, via the connection cable. These are interchangeable, thanks to their Xtrem digital technology.

The cable connection is also compatible with the Xtrem platform WiFi option. This way, you can have a K3X or K3iX indicator connected by cable, and other K3W and/or K3iW model indicators connected by WiFi, with all displaying the weight value at the same time and with all their functions operational. You can also connect Android or IOS smartphone terminals with our Xtrem app software to control the platform from these devices, in conjunction with other classical indicators.

The K3iX model has a highly resistant AISI304 stainless steel structure.

Connection to our printers

Print 3 ticket start lines and 1 end line, including our Z3 THS software for data entry from PC.

Our Q2 labeller prints the data on adhesive label or ticket format.

Large remote indicator

Our cable-connected RD3 remote indicator shows you the weight value at a long distance.

Weight check

The viewfinder changes colour indicating whether the weight is above (red), below (red) or within (green) the established range.

USB Direct, connectivity without PC software.

Using our direct cable between the indicator and your PC, the weighing data will appear in any application or document you have open. No intermediate software or installation; simple and effective.

At the same time, using the WiFi option installed in the platform's Xtrem module, it can be accessed by any of the K3W, K3iW or the Xtrem app for Android or IOS terminals.

Indicators

Any indicator K3X, K3iX, K3W or K3iW, Xtrem app* or Xtrem PC*.

*Needs a Smartphone to be run.

Column Kit

3 column lengths with support in painted or stainless steel, or steering with wheels for portable use.

Feet or wheels

4 wheels, 2 with a brake; replacing the rubber feet to move the platform more easily.

Tables

Highly resistant table with adjustable height and frame-shaped base; for easy cleaning, with non-slip adjustable feet.

Feet or wheels

4 wheels, 2 with a brake; replacing the rubber table feet to move it more easily and safely.

Support tables

With its work table, with or without wheels, or with direct wheels on the platform, and K3W or K3iW indicator, cable-free, you can weigh at the desired height and move it where you need. Also compatible with the K3X and K3iX cable indicators.

To make its installation easier, we have designed this support table of steel and baked epoxy coating.

Without lower base for easy cleaning, it includes guides to fix the feet and prevent the platform from moving.

Adjustable height

The table feet are adjustable for a height between 524 and 798 mm (with rubber feet) or 612 and 886 mm (with wheels).

Rubber wheels (optional)

Optional rubber wheels to move the table comfortably, 2 with a brake.
